

### **Step 5 – Screening Process**

The ASF screening committee will review each application and decide whether or not the school has achieved the standard required to progress to the accreditation stage of the process.

**Approved** – An ASF accreditor will be assigned to schools that have their application approved by the screening committee.

**Not Approved** – A detailed feedback sheet will be sent out to the school by the screening committee indicating the areas where further work is required. Every help will be given to schools to complete the ASF process. Schools are encouraged to re-apply once the necessary changes have been put in place.

**Further Information Required** – The screening committee may request schools to supply addition information in one or more of the review areas prior to approval being given.
